Subject: RE: 703 Rugby Rd Summit house renovations and approvals

The process in a historic conservation district is, first You need to submit enough information to me to determine whether a certificate of appropriateness is required.

I have had discussions with several different persons from the church. Please get the persons you are working with the email me that they have authority to act for the church and exactly what exterior changes they are proposing.

Dan Grogan contacted me in October when I asked if he was in contact with Ian Sole, Laura Horne, Elizabeth Breeden and Katie Corish. He said he was part of that group, but they were out of town. I told him that I would be willing to sign off on his roof replacement, but at that time he was working with Roy Askew and using an Englert roof. So it sounds like we are now starting again from scratch.

The church representatives should confirm the following information:

Roof: Englert or some other manufacturer? FIRESTONE
17" pan width and 1" seam height (to match existing) ~~21"~~ pan (our roofer confirmed this pan size is existing). 1" Seam Height
Hand-crimped, pre-finished metal. Pre-Finished
Englert colors Slate Grey or Dark Brown. Firestone Slate Grey (Will bring a sample with needed)
No ridge vent Correct
Philadelphia gutters to be retained. Yes
No changes to the form of the existing roof. No changes will be made

Windows: confirm that window openings will not be changed in size. Window openings will not change in size.

The type of replacement window is their decision. I had made recommendations to the group when we met last August.

Let me know if you have questions.
