I am willing to approve the same 4 ft. height green vinyl chain link fence because part of the playground already has it, and the fence is not located in front of the historic building. You may proceed.

Are the two openings in the drawing actual openings or gates?

Dear Ms. Scala,

Charlottesville City Schools would like to have additional fencing installed at the front of Venable Elementary School which faces 14<sup>th</sup> St., NW. As this is in the Historical District we seek the approval of BAR for the materials to be used and the location for this project. The new fence will match the style and profile of the existing 4' high Green vinyl fence which runs along the front of the playground on this property. The proposed

new fence will run from the sidewalk facing 14<sup>th</sup> St. NW and then back toward the front southern corner of the building. Please see the attached photo #1277 of the existing fencing and the attached photo *Venable Fence – Front Add* marking the area in which CCS would like to have additional fencing installed.

We await your determination. If you should have any questions please feel free to contact this department.

Thank you,

*Dale Miller* | *Structural Maintenance Team Project Manager*
