Hi Mary Joy:
I wanted to follow up and see if you had any success with your group on the metal vs. decision?
Signed: Hopeful in Charlottesville.

I just received the 5th positive vote, so you are approved to substitute the metal for the composite on the last 4 panels to

plastic last 8'

Due to a Building Code requirement, the applicant is required to use a material other than the approved polycarbonate at least 6 feet from the adjacent wall because it contains a door. May I approved administratively a change in the last 4 panels from polycarbonate to powder-coated gray metal?

I sketched on the attached drawings to show you the location.
