

306 6th Street SW 104-0213-0132

Primary Resource Information: **Single Dwelling, Stories 2.00, Style: Other, ca 1890**
July 2006: This 1890s, 2-story, 2-bay, cross-gabled, side-passage vernacular frame dwelling features a projecting front cross gable. The roof is clad in asphalt shingles and the walls in aluminum siding. The 2/2-sash windows, gable-end returns, transom over the door, and 3-bay front porch with turned posts appear original. Because of the sloped site, the rear of the house has a full basement level. A side 1-story, shed-roofed 1-story wing with modern exterior stairs is on the south side of the rear ell.

Primary Resource Information: **Single Dwelling, Stories 2.00, Style: Other, ca 1890**
July 2006: This 1890s, 2-story, 2-bay, cross-gabled, side-passage, vernacular frame dwelling features a projecting front cross gable and has two front doors, suggesting it is now used as a duplex. The projecting cross gable has a central door on the first floor with a window above it on the second floor. The recessed portion is two bays with a door and small Queen-Anne-sash window on the first floor and a window on the second floor that lines up with the first-floor door. The roof is clad in asphalt shingles and the walls are stuccoed except under the porch where they are covered in wood paneling. The 1/1 windows are modern replacements but the plain friezeboard and gable-end returns are original. The 4-bay hip-roofed front porch has stuccoed piers, a solid balustrade and segmental-arched stuccoed bays. Because of the sloped site, the rear of the house has a full basement level. A rear ell project from the house and has a large modern deck.

309 6th Street SW 104-0213-0148

Primary Resource Information: **Single Dwelling, Stories 2.00, Style: Other, ca 1900**
July 2006: This late-19th-century, 2-story, 2-bay, side-passage, gabled vernacular dwelling has stucco siding, a standing-seam metal roof, 2/2-sash windows, overhanging eaves, and an exterior parged brick chimney along the rear gable side. The transom above the door has been enclosed although the 5-light sidelights are still intact. The 2-bay front porch has stuccoed posts, modern metal railing, and segmental bays formed by stuccoed trim. A 2-story rear ell with 6/6-sash windows and an interior-end brick flue extends to the rear and contains a side porch with shed-roofed second-story wing on the porch roof.

Primary Resource Information: **Single Dwelling, Stories 2.00, Style: Other, ca 1910**

July 2006: This fairly large, 2 ½-story, asymmetrical, 2-bay, early-20th-century, frame dwelling is a variation of the American Foursquare and contains Colonial Revival-style elements. Resting on a parged foundation, the walls are clad in vinyl siding and hipped roof with lower cross gables is covered in standing-seam metal. An oversized hip-roofed front dormer features paired modern windows and overhanging eaves. The 6/1-sash windows are all replacement but the 3-light sidelights around the door, the overhanging eaves, the gable-end returns, and the 3-bay front porch with Tuscan columns appear original. A 2-story rear ell with side-2-story shed-roofed wing extends to the rear in addition to a 1-story wing with an interior brick chimney.

Other DHR Id #: 104-0213-0144

Primary Resource Information: **Single Dwelling, Stories 2.00, Style: Second Empire, ca 1879**

July 2006: Listed on the National Register of Historic Places as part of the Charlottesville Multiple Resource Area District, this dwelling combines the Italianate, Second Empire and Gothic Revival architectural styles, all of which were popular during the mid-to-late 19th century. The asymmetrical house is comprised of a 1 ½-story, 2-bay, single-pile side-passage-plan, gable-roofed main block with an off-center gable-roofed front wall dormer that breaks through the overhanging eaves and gives the house its Gothic Revival aspect. This section contains the front entrance door which is topped by a 2-light transom. The walls are stuccoed, and the standing-seam metal roof contains a central brick chimney. A 3-bay hip-roofed front porch is supported by turned posts. The windows on this section are varied: the dormer contains paired 4/4-sash, the front window 1/1-sash, and the side elevation 6/9-sash. A 2-story, 2-bay, gable-roofed wing with 6/6-sash windows, and an enclosed 1-story, shed-roofed, porch along the south side extends to the rear. A visually prominent 2-story, 1-bay tower with a Mansard roof projects forward along the northeast side of the main block, lending Second Empire and Italianate elements to the dwelling. A full two stories tall, the stuccoed tower features narrow paired 1/1-sash windows on the both floors, overhanging eaves, a plain frieze and steeply pitched Mansard roof clad with metal plates. The house was constructed between 1875 and 1879 and was in this basic configuration when it appeared on the 1907 Sanborn Map. It is a very interesting vernacular adaptation of popular Romantic architectural styles of the period and unlike any other in the district.

Primary Resource Information: **Mixed:Commerce/Domestic, Stories 2.00, Style: Other, ca 1910**

July 2006: Now used as a dwelling, this ca. 1910, 2-story, 3-bay, hip-roofed building appears to originally have been constructed as a mixed-use building: commercial on the first floor and residential on the second. Laid in 7-course American bond, the building has a standing-seam metal roof, segmental brick arches over the window openings, 2/2 and 6/6-sash windows, a plain frieze, overhanging eaves, and a boxed cornice. Originally, the first-floor front windows were larger and the openings have since been reduced in size and modern windows introduced into the space. The building has a second-story modern wood balcony with a hood covering the central door. Supported by wooden braces located directly above the first-floor door, this balcony provides some shelter for the first-floor opening beneath it.

Primary Resource Information: **Single Dwelling, Stories 2.50, Style: Other, ca 1925**

July 2006: This 2½-story, cube-shaped, 2-bay, hip-roofed American Foursquare was constructed ca. 1925. It is clad in aluminum siding, with modern single and paired 1/1-sash windows. The roof, with overhanging eaves, is covered in asphalt shingles and contains an oversized hip-roofed front dormer with paired windows and an interior brick chimney in the rear. The 3-bay, hip-roofed front porch has Tuscan column supports and plain pickets.

Primary Resource Information: **Single Dwelling, Stories 2.00, Style: Other, ca 2006**
July 2006: This 2-story, 5-bay, gable-end dwelling was constructed in 2006 by the Piedmont Housing Alliance. It is clad in Hardi-plank simulating weatherboard and the roof is covered in asphalt shingles. The 3-bay shed-roofed front porch is covered in standing-seam metal and has chamfered posts and plain pickets. The house has 2/2 and 4-light windows and blends in well into the historic neighborhood despite its age.

315 7th Street SW 104-0213-0093

Primary Resource Information: **Commercial Building, Stories 2.50, Style: Other, ca 1940**

July 2006: Constructed ca. 1940, this building, now used as a youth center, was originally constructed as a store. The 1-story, 3-bay, concrete block building has a shed roof with a stepped parapet along the front and side elevations. The building originally had larger storefront windows along the front but they have been removed and replaced with small 1/1 sash.
