Families with parents with disabilities- Gap DARS long waiting list, Region Ten

Non-English speaking parents- Gap

Homeless families with children- Gap

Teenage parents- Gap

Mary will compile and take to CPMT. Program will discuss the division of funds based on the needs. One portion has to go to family reunification. Five years ago, the family preservation funds stayed in DSS partly in due to concerns about CSA funds restrictions. It is a large need within DSS. Family support was used differently in the city and county. Early intervention identified the need, county used it for summer enrichment. The city used it for a jumpstart program to get kids ready for school.

Should the money be focused differently? Housing, psychiatric, transportation. It's about \$9000 for family support. The city school would like to continue to use the money on jumpstart or a program with a similar intent. Could use it for parent education, buying books, teaching parents how to read out loud to children, activities to prevent summer slide as they lose gains over the summer? Can serve a large number of kids? Separate applications are being submitted for the city and county. Does Program want to continue to use the funds the same way? The group wants to keep it the same way. We are meeting in March. Mary will take to CPMT with same recommendations without specifics to what.
